## **Professor Kobayashi**

Course Schedule: M: 6:05-9:00PM, Room TBA. This syllabus updated on 12/10/2020

Zoom Information:

## **Required Texts:**

- (FL) Finkelstein and Levin, Statistics for Lawyers, 3d. ed. (Springer-Verlag 2011).
- (FJC) Federal Judicial Center Reference Manual for Scientific Evidence, 3d Edition, available online at <https://www.fjc.gov/sites/default/files/2015/SciMan3D01.pdf>

## **Learning Outcomes:**

This course will expose students to the theory, methodology, and use of statistical and empirical evidence in legal settings. The aim of the course is to familiarize the student with the methodology and inferential tools of statistical analyses. Upon completing this course, students will be able critically analyze the methodology and inferential process used to produce statistical evidence, and be prepared to evaluate and challenge the admissibility, relevance, and strength of statistical evidence prepared by expert witnesses in litigation settings.

## **Course Requirements:**

Writing Assignments:

- Two assignments, each worth 25% of the grade, and one assignment worth 50% of the grade
- Assignments will be posted one week in advance of the due date on the TWEN assignment drop box.
- All assignments must be submitted in PDF format using the drop box.
- E-mail submissions or submissions in other formats will not be accepted.

Class Attendance is Mandatory.

- Anyone missing more than three classes will not receive course credit.
